

BMW E46 Coupe Door Handles Installation Instructions

There's a very detailed video on how to remove the door card/panel. After removing the door panel, continue with the instructions below.

Watch here:

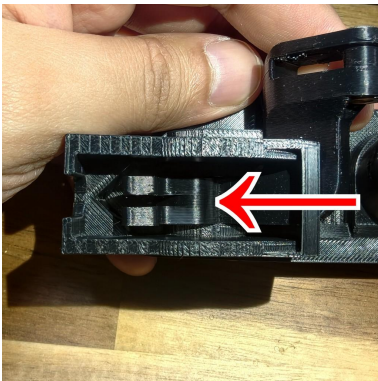

[YouTube BMW E46 M3 330ci 328ci 325ci...](#)

After removing the door handle from the door card by removing the three screws holding the speakers in place, we need to cut a little bit of the door panel.

Follow the red lines shown in the picture and the result should be similar to the second picture.

It doesn't need to be perfect as it will be covered by the new door handle.

Install back the new door handle to the door with the existing screws, making sure the speakers are in place.

IMPORTANT: Make sure that when you install the door latch back into the door handle, it's fully retracted back so the door cable sits in place.

Install everything back in reverse order and you can now test your new door handles.
